

Key Stage 2 News Spring 2025

Things to note

Teachers will continue to inform you if they need any specific items for a student's individual timetables.

We are still experiencing frosty mornings and chilly winds, so please check your child has a named, warm, waterproof coat in school each day. Thank you.

Topic

This term's topic is 'What is above me?'

We are learning about space, learning the names of the planets and viewing them through an amazing app on our iPad. This topic gives us lots of art opportunities. A favourite so far has been creating our own amazing model spaceships and rockets! We've also been focusing on Earth and listing adjectives to describe our planet, and how these words can be used to create sentences. We've also looked at the different phases of our Moon. Purple class enjoyed using half an Oreo biscuit and its filling to show the different phases of the moon!

Our maths focus this term is 'Comparison', comparing quantities and numerals and understanding that totals cannot change depending on size or space. We've been comparing and sorting shapes through 3D puzzles and reviewing different measurements.

In PSHE, we have been focusing on 'Online Safety'. Some classes have also enjoyed Taiko Drumming sessions!
