Children & Family Health Devon Leaders

Have a say in how local services develop and improve!

Here's what current Leaders say about our group:

"If you've had experience with the NHS, good or bad, then Leaders is a great opportunity to make things better and see things change. I've made some great friends whilst being in Leaders, and gained experience in lots of different things"

"Leaders is a great way to share your ideas about how health services can best help young people, in a way that can create real change. You don't need any skills already to join, your experience as a young person is enough"

We work together with local health services to help them give the best possible care.
